AMENDMENTS TO THE CLAIMS

1. (Original) A peptide consisting of 8 - 11 contiguous amino acids in the amino acid sequence of livin set forth in SEQ ID NO: 1, which binds to HLA-A24 antigen and is recognized by CTLs.

- 2. (Original) The peptide according to claim 1, which comprises an amino acid sequence set forth in any one of SEQ ID NOS: 2 59.
- 3. (Original) The peptide according to claim 2, which comprises an amino acid sequence set forth in any one of SEQ ID NOS: 6 9.
- 4. (Original) A peptide of 9 11 amino acids which comprises an amino acid sequence wherein the amino acid residue at position 2 and/or C-terminus of an amino acid sequence set forth in any one of SEQ ID NOS: 2 59 is substituted by another amino acid residue, and which binds to an HLA-A24 antigen and is recognized by CTLs.
- 5. (Original) The peptide according to claim 4, which comprises an amino acid sequence wherein the amino acid residue at position 2 and/or C-terminus of an amino acid sequence set forth in any one of SEQ ID NOS: 2 59 is substituted by an amino acid residue selected from the following amino acids:

tyrosine, phenylalanine, methionine and tryptophan for the position 2; and phenylalanine, leucine, isoleucine, tryptophan and methionine for the C-terminus.

6. (Original) The peptide according to claim 5, which comprises an amino acid sequence wherein the amino acid residue at position 2 and/or C-terminus of an amino acid sequence set forth in any one of SEQ ID NOS: 6 - 9 is substituted by an amino acid residue selected from the following amino acids:

2 DRN/smt

tyrosine, phenylalanine, methionine and tryptophan for the position 2; and phenylalanine, leucine, isoleucine, tryptophan and methionine for the C-terminus.

- 7. (Currently amended) An epitope peptide comprising a peptide according to any one of claims 1 to 6 claim 1.
- 8. (Currently amended) A peptide dimer in which peptide monomers according to any one of claims 1 to 7 claim 1 and containing a cysteine residue(s) are bound through a disulfide bond.
- 9. (Original) The peptide dimer according to claim 8, in which peptide monomers comprising an amino acid sequence set forth in any one of SEQ ID NOS: 7 9 are bound through a disulfide bond.
- 10. (Currently amended) A polynucleotide encoding a peptide according to any one of claims 1 to 7 claim 1.
- 11. (Original) An expression vector containing the polynucleotide according to claim10.
 - 12. (Original) A cell containing the expression vector according to claim 11.
- 13. (Currently amended) A process for producing a peptide according to any one of claims 1 to 9 consisting of 8 11 contiguous amino acids in the amino acid sequence of livin set forth in SEQ ID NO: 1, which binds to HLA-A24 antigen and is recognized by CTLs, which comprises culturing the cell according to claim 12 under the condition where the peptide can be expressed.
- 14. (Currently amended) An antibody which specifically binds to a peptide according to any one of claims 1 to 9 claim 1.

15. (Currently amended) An antigen-presenting cell which presents a complex between a peptide according to any one of claims 1 to 9 claim 1 and HLA-A24 antigen.

- 16. (Original) The antigen-presenting cell according to claim 15, which presents a complex of a peptide comprising an amino acid sequence set forth in any one of SEQ ID NOS: 69 and HLA-A24 antigen.
- 17. (Currently amended) A CTL which recognizes a complex between a peptide according to any one of claims 1 to 9 claim 1 and HLA-A24 antigen.
- 18. (Original) The CTL according to claim 17, which recognizes a complex between a peptide comprising an amino acid sequence set forth in any one of SEQ ID NOS: 6 9 and HLA-A24 antigen.
- 19. (Currently amended) A pharmaceutical composition which comprises a peptide according to any one of claims 1 to 9 claim 1, an expression vector according to claim 11, a cell according to claim 12, an antigen-presenting cell according to claim 15 or 16, or a CTL according to claim 17 or 18, together with a pharmaceutically acceptable carrier.
 - 20. (Canceled)
 - 21. (Canceled)
- 22. (Original) A diagnosing agent for cancer which comprises an antibody according to claim 14.
- 23. (Currently amended) An HLA monomer, dimer, tetramer or pentamer comprising a peptide according to any one of claims 1 to 9 claim 1 together with HLA-A24 antigen.

24. (Original) The HLA monomer, dimer, tetramer or pentamer according to claim 23, which comprises a peptide comprising an amino acid sequence set forth in any one of SEQ ID NOS: 6 - 9 together with HLA-A24 antigen.

- 25. (Currently amended) A reagent for the detection of CTLs specific for an HLA-A24-binding cancer antigen peptide derived from livin, which reagent comprises an HLA monomer, dimer, tetramer or pentamer according to claim 23 or 24 as an ingredient.
 - 26. (Canceled)
- 27. (New) A pharmaceutical composition which comprises a peptide expression vector according to claim 11, together with a pharmaceutically acceptable carrier.
- 28. (New) A pharmaceutical composition which comprises a cell according to claim 12, together with a pharmaceutically acceptable carrier.
- 29. (New) A pharmaceutical composition which comprises an antigen presenting cell according to claim 15, together with a pharmaceutically acceptable carrier.
- 30. (New) A pharmaceutical composition which comprises a CTL according to claim 17, together with a pharmaceutically acceptable carrier.
